Notes

Data downloaded from <http://www.ngdc.noaa.gov/nndc/struts/results?&t=102597&s=1&d=1>. where they appear as deployment d165_1999. Data were supplied at 15 second sampling and were downsampled to 15 minute intervals.

An offset of 500 bar was removed from the raw pressure data.

This station was known as D165 until 2002 when it became station 46402.

Raw pressures were converted from psia to mb using a conversion factor of 68.947573.

Latitudes, longitudes and depths specific to this deployment were obtained from <http://www.ngdc.noaa.gov/nndc/struts/results?&t=102597&s=1&d=1>.

Note that the M2 tidal amplitude and phase for deployments prior to and including 46402_0506 differs significantly to the amplitude for subsequent deployments, perhaps indicating that station positions have changed, although this is not supported by metadata shown at <http://www.ngdc.noaa.gov/nndc/struts/results?&t=102597&s=1&d=1>.
