Deployment 43412_1214
(NDBC 43412 - South West Manzanillo - 240 NM SW of Manzanillo, Mexico)

Location
Latitude: 16.069
Longitude: -106.996
Depth: 3155 m
Ocean region: 2.3 - Tropical Pacific Ocean

Time Span
Start Date: 2012-09-20
End Date: 2014-03-17

Notes
Data downloaded from http://www.ndbc.noaa.gov/historical_data.shtml

For tsunameter data from the NDBC (largely from the Deep-Ocean and Reporting of Tsunamis network), information regarding deployment and recovery dates is limited. Therefore, annual files of quality controlled data are initially concatenated for each station and plotted in order to identify the start and end times of each deployment. The data are segmented into individual deployment time series, so the deployment and recovery dates are assumed dates.

Raw NDBC data have varying sampling frequencies depending upon the operating mode (i.e. whether there is a tsunami alert). Standard operating mode (1) uses 15 minute spot values, mode 2 data consists of 1 min averages of 4X15 sec spot values and mode 3 is 15 second sampling. Mode 3 data were sub-sampled to the frequency of mode 1, but mode 2 data were not compatible and were treated as missing.

Raw pressures were obtained in metres from NBDC but had been converted from psia using a conversion factor of 0.67. The true conversion should have used 0.68947573, so to convert to mb, we multiplied by \( \frac{102.9}{0.68947573/0.67*100} \).

An offset of 315 bar was removed from the raw pressure data.

Latitudes, longitudes and depths specific to this deployment were not available, so they are taken to be those shown for the latest deployment shown on webpage www.ndbc.noaa.gov/station_page.php?station=43412 as at 08/08/2014.

Data Amended 27/08/15. Data to March 2014 were appended to this record.

Channels

43412_1214 (Preferred Channel)
