Deployment 44401_1011
(NDBC 44401 - 620 NM S of St Johns, 790 NM NE of Bermuda)

Location
Latitude: 37.561
Longitude: -50.001
Depth: 5377 m
Ocean region: 1.2 - Northwest Atlantic Ocean

Time Span
Start Date: 2010-05-25
End Date: 2011-04-15

Notes
Data downloaded from http://www.ndbc.noaa.gov/historical_data.shtml

For tsunameter data from the NDBC (largely from the Deep-Ocean and Reporting of
Tsunamis network), information regarding deployment and recovery dates is limited.
Therefore, annual files of quality controlled data are initially concatenated for each station
and plotted in order to identify the start and end times of each deployment. The data are
segmented into individual deployment time series, so the deployment and recovery dates
are assumed dates.

Raw NDBC data have varying sampling frequencies depending upon the operating mode
(i.e. whether there is a tsunami alert). Standard operating mode (1) uses 15 minute spot
values, mode 2 data consists of 1 min averages of 4X15 sec spot values and mode 3 is 15
second sampling. Mode 3 data were sub-sampled to the frequency of mode 1, but mode 2
data were not compatible and were treated as missing.

Raw pressures were obtained in metres from NBDC but had been converted from psia
using a conversion factor of 0.67. The true conversion should have used 0.68947573, so
to convert to mb, we multiplied by 102.9 =0.68947573/0.67*100.

An offset of 550 bar was removed from the raw pressure data.

Latitudes, longitudes and depths specific to this deployment were not available, so they
are taken to be those for the latest deployment shown on webpage www.ndbc.noaa.gov/
station_page.php?station=44401 as at 11/12/2014.

Channels
44401_1011 (Preferred Channel)
Parameter: pressure
